Note

- 1. This table will be updated in line with firmware update and is subject to change without prior notice;
- 2. For Sony cameras, after connecting gimbal and camera with control cable, Please first power on the gimbal and then the camera. Make sure the camera has sufficient power to operate. Optical zoom control is available on the gimbal when used with non-motorized lens. Please select zoom option in your camera's settings;
- 3. When shooting Panorama or Timelapse, it is recommended to turn off the camera's auto review (Sony), image confirmation (Canon), auto review (Panasonic), image review (Nikon) to reduce system latency.
- 4. The Canon DSLR cannot realize the halfway press shutter button to autofocus in Live Preview. If the feature is used, the camera Live Preview mode should be turned off.
- 5. Before connecting Panasonic G9 with a control cable, please first turn off the USB Power Supply in camera settings
- 6. When connecting an Olympus camera to the gimbal, USB Mode will automatically pops up on the camera. Please select [🖵 📬] (PC (Tether)) and dial the mode to P, A, S, or M mode.
- 7. "\" means the camera can achieve the function after connecting to the gimbal; "\" means the camera currently cannot achieve the function after connecting to the gimbal, but there' re possibilities that the function may be available after the firmware upgrade or other ways. "-" means the function is not available after connecting to the gimbal due to the unopened camera protocol.
